LOT 30 - Geography of Newfoundland By Rev. William D. Pilot (1906)

Description

Geography of Newfoundland

By Rev. William D. Pilot (1906)

Geography of Newfoundland (1906) by Rev. William D. Pilot is an educational text that was widely used as a schoolbook in Newfoundland during the early 20th century. The book offers a comprehensive look at the island's physical features, climate, and resources, while also addressing the socio-economic aspects of the region. Designed for students, it covers topics such as the geography of the island's districts, the industries that shaped its economy, and the cultural influences that defined its people. This work provides valuable insights into how Newfoundland's geography influenced its development and was an essential resource in shaping young minds during that era.
