LOT 781b - Brass port light

Length (inches) 40

Width (inches) 12

Description

This elegant solid brass port light measures approximately 40 inches long and 12 inches wide, making it a striking addition to any nautical-themed decor. Unlike a traditional porthole, which is typically round and smaller, this port light features a rectangular design, characteristic of the exterior windows found on vessels. While it does not open, its sturdy construction and polished finish reflect the craftsmanship and durability expected from maritime fixtures. The brass material gives it a timeless quality, enhancing its aesthetic appeal as both a decorative piece and a testament to maritime history. Whether displayed in a home, office, or gallery, this port light is sure to evoke the charm and spirit of the sea.
