LOT 45 - Formula Fig: All-In Facial

Description

Relax with an All-In Facial at Formula Fig!

All-In Facial Website Description: One of our Supers facials (for a reason). This treatment combines exfoliation with high-tech lifting, sculpting, and hydration techniques to go “all-in” on your skin. Results include improved muscle tone, facial circulation and contours, lifted jowls and eyebrows, and reduced appearance of fine lines and wrinkles.

TECHNOLOGY + TOOLS USED:

Diamond-Tip Microdermabrasion - A form of advanced exfoliation designed to remove dead skin cells, stimulate new cellular growth, and give the skin a fresher, brighter, and more luminous appearance.

Microcurrent - A low-level current that mimics the body's natural frequencies to lift and tone the muscles of the face. It provides both instant and cumulative firming results and facial contouring effects.

Ultrasound - High-frequency sound waves stimulate collagen and blood circulation by working their way deep into the skin, past the top layers of the epidermis and facial muscles. This elicits a healing reaction that plumps, reduces redness, and helps soothe breakouts and inflammation.

LED Light Therapy - A form of light therapy that penetrates the skin to target different concerns. Results in skin rejuvenation, tissue repair, reduced inflammation, decrease in harmful bacteria, and collagen stimulation.

Ultrasonic Skin Slider (optional) - The ultrasonic skin slider uses high frequency to gently dislodge dirt and debris on skin's surface to further aid in exfoliation.

The Skin Educator will assess your skin and choose the exact technologies at time of treatment.

Value: \$185

Generously Donated by Formula Fig Kitsilano
